What is GeoGebra?

GeoGebra is dynamic mathematics software for all levels of education that brings together geometry, algebra, spreadsheets, graphing, statistics and calculus in one easy-to-use package. Quick Facts:
- Geometry, Algebra and Spreadsheet are connected and fully dynamic
- Easy-to-use interface, yet many powerful features
- Authoring tool to create interactive learning resources as web pages
- Available in many languages for our millions of users around the world
- Open source software freely available for non-commercial users
- **Very iPad friendly!**

**Resources** gets you access to thousands of searchable pre-designed applets and digital resources that provide visual and manipulative tools for students and teachers alike.

**GeoGebra Classic** lets you create, measure, manipulate and program various algebraic functions and geometric figures.

**Spreadsheet** lets you input one- and two-variable data and lets you easily create and quickly change between displays of data to best fit your needs. It offers many of the same features of Excel, but is much more iPad friendly.

**Geometry** lets you construct, measure, manipulate and program various geometric figures.
